

Gene Circuit

Participants: Caius Gibeily, Laurence Seeley

Collected data on various MAAs alongside shinorine for use in the sunscreen. Looked at shinorine production in previous papers highlighting issues with the preliminary design and methods for enhancing our gene circuit to improve production rates *in vivo*.

Logo Design

Participants: Isobel Guthrie, Bradley McCallion, Laurence Seeley

Continued with the logo design, using inkscape and other technologies. Isobel Guthrie work:

Reef Conservation Case Study

Participants: Yaxuan Kong, Poli Foteva, Soo Bynn Lee

Team discussed the form, goals and possible outreach of cosmetics industry. Also discussed specifics regarding the ethnical approval and questions to be included in the form.

Modelling

Participants: Laurence Seeley, Caius Gibeily

Compiled data on the kill switch in iBioSim to visualise and simulate the system in place. Uploaded further information concerning UirR/S, thermodynamic modelling and promoter dynamics.

Wiki

Participants: Bradley McCallion, Issac Li

Issac Li looked at example wiki pages from past iGEM teams; Bradley McCallion did online courses in codeacademy on web development for preparation
