

Survey for Crohn's-Colitis Foreningen (CCF), Denmark

The following are the results from a survey made by CIDosis iGEM 2020 Team from University of Copenhagen. It is a full representation of our survey & some of our responses.

Questionnaire for CIDosis

The purpose of this form is for our team to get a perspective on inflammatory diseases, particularly Crohn's Disease and Colitis. We hope that the information provided by you will help us design a device which shortens the time spent looking for the right type of medication. The questionnaire is anonymous.

The questions marked with a red * are required to be answered by you for us to make a detailed and accurate analysis.

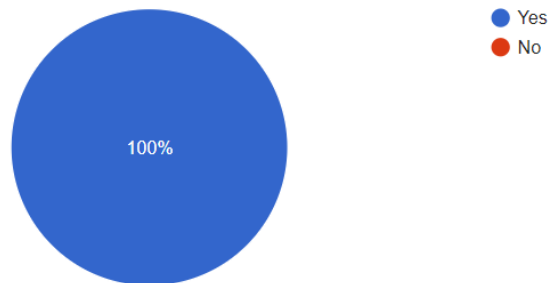

We will be saving your information till the end of the project (December, 2020). The survey should not take more than 3 minutes.

Thank you for your time and patience.

Regards
UCPH iGEM Team 2020

Do you consent to giving information pertaining to your age and disease?

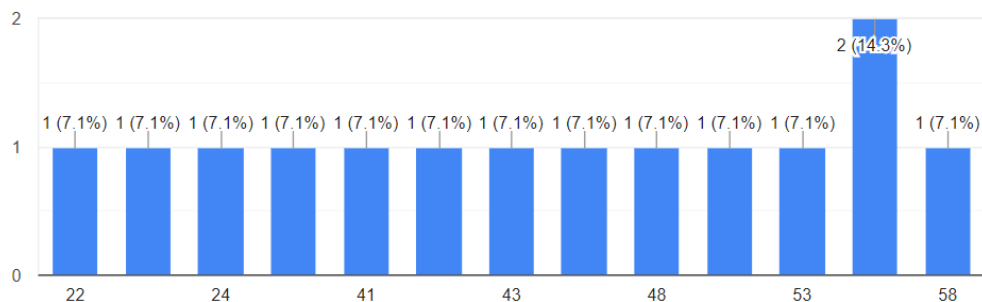

14 responses

Personal Information

What is your age?

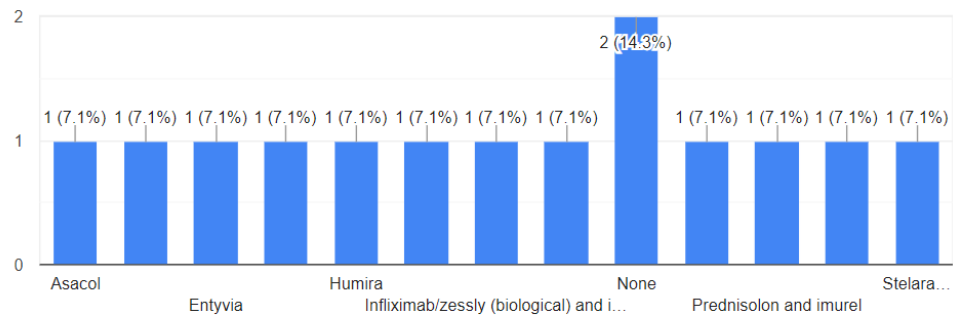

14 responses

Medication

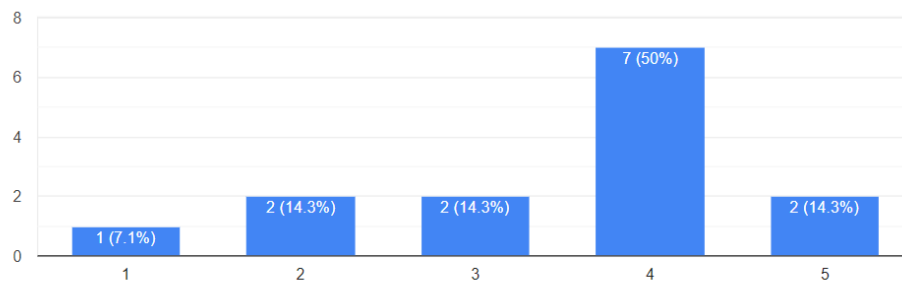

What medication do you take?

14 responses

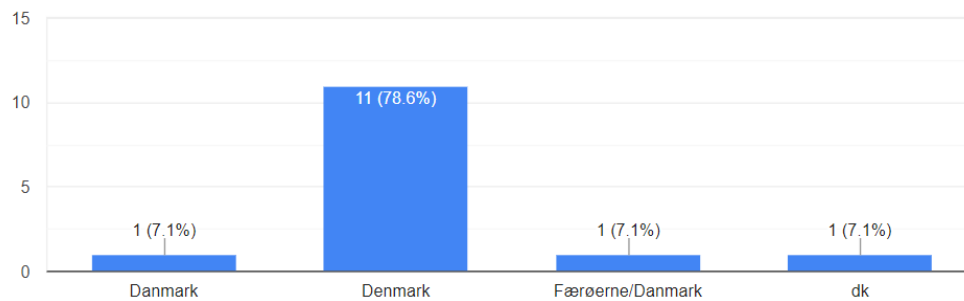

To what degree, on a scale of 1-5, are you satisfied with the treatment (1 being the least and 5 being the highest)?

14 responses

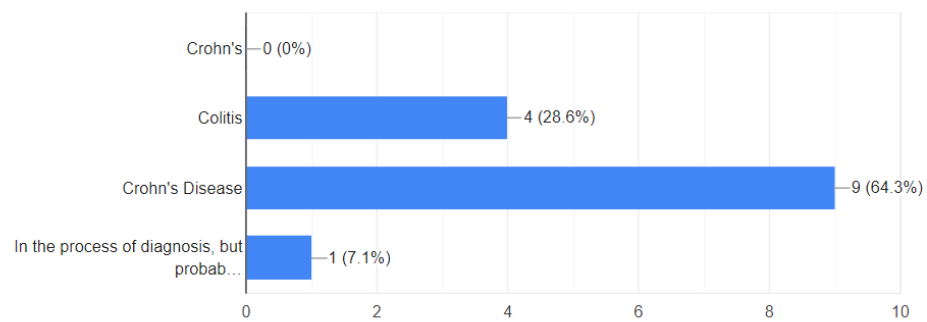

Which country provides you with healthcare?

14 responses

What chronic inflammatory disease do you have?

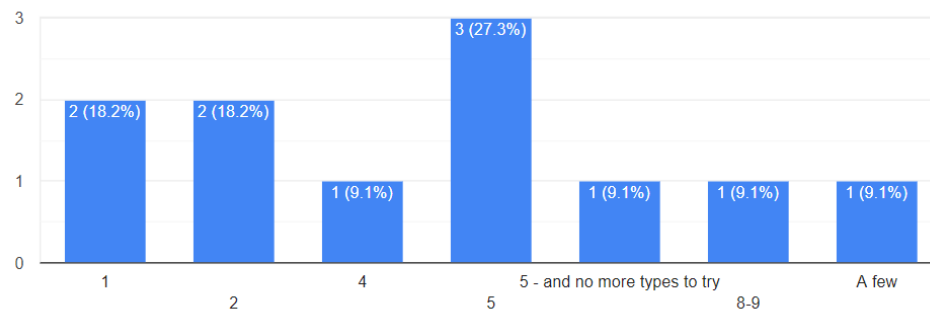

14 responses

Change in medication

How many different medications did your doctor prescribe for you before the current one?

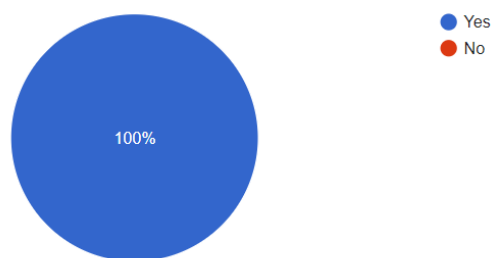

11 responses

Follow-up Routine

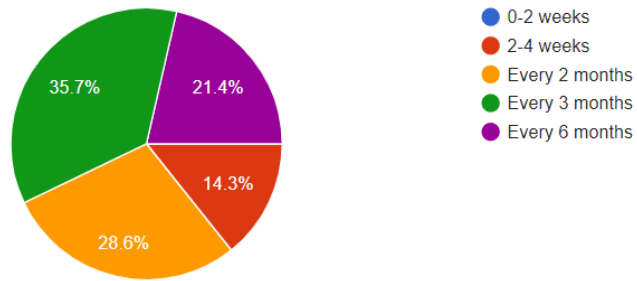

Do you undergo periodic tests to check the effectiveness of the treatment?

14 responses

How often do you need to go to check the effectiveness of your current medication?

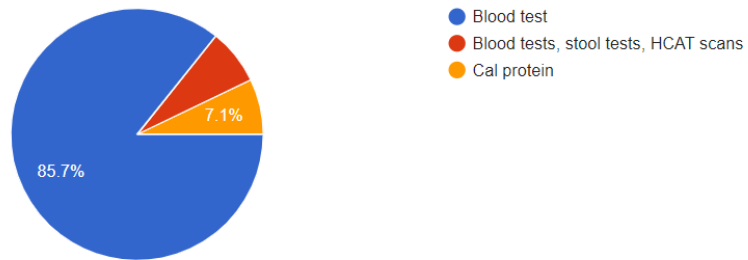

14 responses

Follow-up Continued...

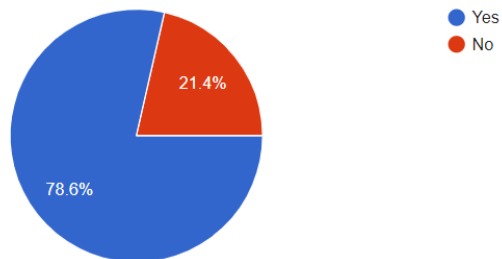

What kind of a check-up routine do you follow to check the effectiveness of your current medication?

14 responses

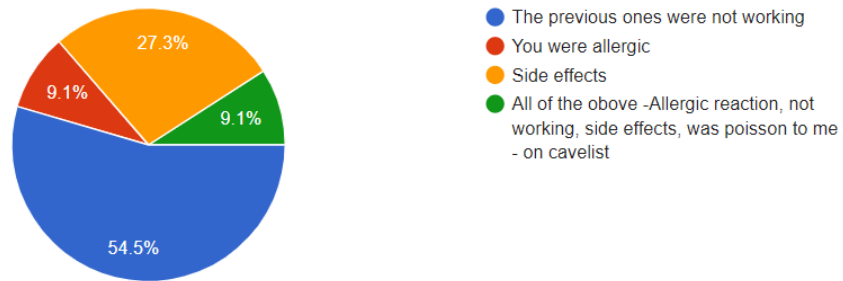

Did the doctor change your medication before the current one?

14 responses

Why did the doctor change the medication(s)?

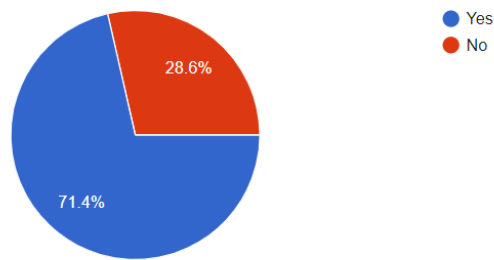

11 responses

CIDosis

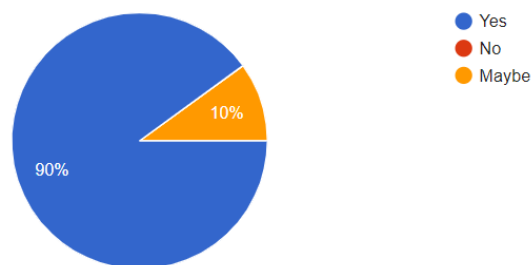

Would you be willing to change your current testing method with a sweat patch worn on your skin?

14 responses

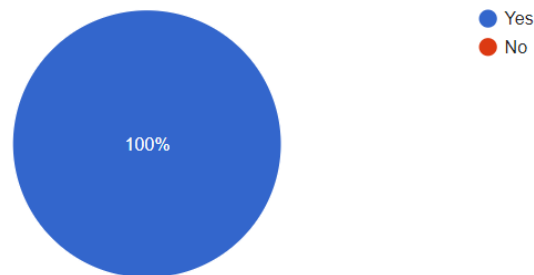

Would you be okay with the patch containing genetically modified yeast?

10 responses

What if we told you that it will be the same type of harmless yeast that is used for baking or to make beer, but this time it will also have an additional function to detect inflammation and show a colour change? Would you be willing then?

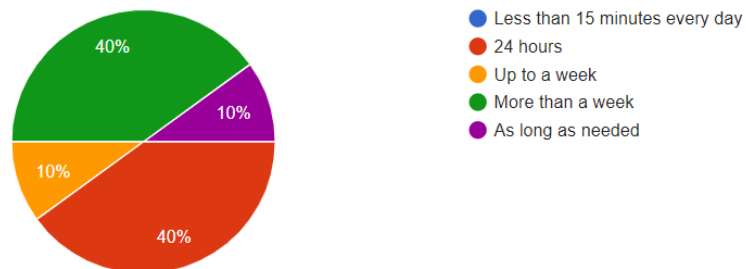

10 responses

What is CIDosis

What is the longest time you would be willing to wear the patch?

10 responses

Concern over CIDosis

Why would you be unwilling to wear the sweat patch?

4 responses

Ved ikke hvad det er/ dont know what it is

Not precise enough

Ineffektive

Because patches give me rasch

Feedback

Are there any questions or areas we have not covered in this questionnaire that you think would be relevant for us to design the sweat patch?

4 responses

The placement of the sweat patch - and whether you can go showering/swimming while wearing it.

Hard to answer this survey without more explanations. How would it look? How large? Where would it be placed? Could i place it myself or do i have to go to the hospital to get it placed without risk of mistakes? Can i take it of myself? Can i read the results and trust them myself? How to i report back to the hospital? What can it see other than CRP?

What is it?
