

Gene Circuit

Participants: Laurence Seeley, Caius Gibeily

Continued to look at the gene circuit and certain kill switch mechanisms. Outlined further issues with the gene circuit to be further researched.

Logo Design

Participants: Isobel Guthrie, Megan Fletcher, Bradley McCallion, Anneleen de Ruiter, Yaxuan Kong

Team started work on a preliminary logo design for our new company 'Shinescreen' and discussed some next steps too. Isobel Guthrie work:

Funding

Participants: Poli Foteva, Caius Gibeily, Isobel Guthrie, Yaxuan Kong, Bradley McCallion, Anneleen de Ruiter, Laurence Seeley

Team continued with the revive and restore grant and additional funding opportunities.

Video

Participants: Megan Fletcher, Caius Gibeily, Isobel Guthrie, Yaxuan Kong, Bradley McCallion, Anneleen de Ruiter, Laurence Seeley

Started on the promotional video for experiment.com and for the final iGEM wiki looking at different software to help us.

Reef Conservation Case study

Participants: Poli Foteva, Yaxuan Kong, Anneleen de Ruiter

Began looking at information regarding reef conservation Case Study and questionnaires about sunscreens and the general public opinion as part of our market research.

Modelling

Participants: Laurence Seeley, Caius Gibeily

Modelled lacI dynamics and the probability of repression for toxin production given the preliminary gene circuit design.

Began researching information on the skin environment in relation to bacterial survival and growth. Further searched for information regarding E.coli survival in water in relation to waterproof-resistance.
